

Corvettes @ The Pier Show

Valve Cover Racing Rules

Valve Cover Size & Regulations:

- Small block valve cover, no big blocks.
- This is a gravity race only. (*No propulsion of any kind.*)
- Wheels must be affixed to solid suspension only. No springs or shocks.
- No moving parts except for wheel rotation.
- Overall outside car width is 10.5 inches maximum, wheel to wheel.
- Wheels cannot extend beyond the front and rear of the valve cover.
- Wheels cannot exceed 4 inches in diameter and are limited to four in total.
- Car may be decorated or painted (*or not*).
- Finished total weights must be fixed. No liquid filled weights.
- Maximum weight for finished valve cover racer is 8 pounds.
- Must have four wheels that make ground contact.

Race & Distance:

- Track boundaries will be 14 feet wide (*or maximum allowable if location is narrower*).
- Ramp will be placed at one end in the center of the boundaries.
- Car launch must be made with rear wheels against the ramp backstop and must not be pushed in any way.
- If the valve cover goes out of bounds it will be judged at the point it crosses the established boundary.
- Distance races are measured from the front of the launch ramp to the center line of the rear axle closest to the end of the launch ramp.
